

extraks

- Double your lug life
- More positive track engagement
- Lower track tension, reduces splitting
- Fitted in an hour using basic tools
- Fits inside existing machine width
- Fits Cat 247 /257/B,D Terex & ASV
- Patent Pending design
- Many satisfied users

"I am very impressed with the quality and ease of fitting of the Extraks. Really like the much improved machine control on steep slopes and restricted access areas. Well done Progressive"

Ces Goldsack, Turfworks Northland Ltd

Extraks are a patent pending accessory for open sprocket MTL CAT, TEREX & ASV machines. Extraks utilise the unused outer drive lug, to increase track stability, reduce track jumping and drive lug damage. Tracks can be run with less tension, reducing track fatigue, internal cord damage and splitting. The open design allows dirt and mud to be released easily, do not increase the width of the machine and can be installed in less than an hour. Another quality product from Progressive Equipment Ltd, allowing you to "Do more with less"
